STANDARD TUB

DISHWASHERS

2014 / 2015
With over 130 years of production and expertise in the appliance and metal industries, Blomberg is a quality name in the European household appliance market. Owned by Arçelik, the 3rd largest appliance manufacturer in Europe, Blomberg has gained a sizeable presence in the European home. For years Blomberg has been setting trends in both technology and style and continues to employ technologically advanced appliances, while still keeping the everyday family life in mind. Blomberg has introduced an outstanding collection of tall tub dishwashers with advanced German engineering and state-of-the-art design. All Blomberg dishwashers are ENERGY STAR qualified to conserve energy and save you money. Blomberg’s 5 level wash system and 167°F water temperature will make your dishes sparkling clean. All dishwasher models are extra quiet, dependable and backed by an exceptional warranty.

**IN HARMONY WITH NATURE**

**ENVIRONMENTALLY FRIENDLY**

**Maximum energy efficacy**
All Blomberg products are ENERGY STAR qualified, offering you cleaner dishes while saving you money and energy.

**Harmless Components**
Blomberg dishwashers are not only energy efficient but also RoHS compliant. The products are built of 99.9% lead-free materials, and 85% of our components are recyclable.

**IN HARMONY WITH YOU**

**PRACTICAL**

**Electronic controls**
The electronic display offers you a quick and easy way to select your programs. Additionally, products with numerical display offer an “end of cycle audible signal”, which reminds you that your wash cycle has finished and the dishes are ready to use. Also, the hidden control panel prevents your children from changing programs and playing with your dishwasher.

**Time saving**
Blomberg understands that your time is precious and provides a 30-minute quick wash program alternative for your lightly soiled dishes.

**ALL IN 1**
Blomberg dishwashers perform well with all types of compact datargents.
Flexible upper rack
Multi flex racks with flip down tines in the lower rack and smartFOLD™ plate supports in the upper rack have been designed to maximize space in your dishwashers, allowing large items to be easily washed. With the flip down shelves you maximize space by using lower and upper parts of the shelf at the same time. You can wash long utensils and cappuccino/espresso cups all together, increasing capacity. What’s more, the flip down shelves in the upper rack can be positioned at different levels allowing you to wash tall champagne flutes with short brandy glasses.

Height-adjustable upper rack
Blomberg dishwashers all have a weight-adjustable upper rack, which can be raised to make room for pans, platters and baking trays in the bottom rack or lowered to accommodate tall glasses. Available in some models is FlexiRack, which allows you to adjust the rack height in one simple action even when the rack is fully loaded.

Sliding cutlery basket
Your Blomberg dishwasher’s cutlery basket can be replaced anywhere in the front row of the dishwasher by simply sliding it from side to side. Sliding cutlery basket is not available on 18” models.
smartFIT™ and smartBALANCE™
Blomberg developed a height adjustment mechanism called smartFIT™, which allows the rear feet to be adjusted from the front. In addition, fully integrated Blomberg dishwashers have a front adjustable hinge system, smartBALANCE™, which helps achieve a perfectly balanced door by adjusting the dishwasher to weight of your kitchen cabinet door.

5 level wash
The 5 level wash system ensures immaculately clean dishes. The two spray arms, placed in the bottom and the middle of the dishwasher, and the third spray arm at the top spray water from every direction, reaching even the most remote parts of your dishes.

Stainless steel tank
Blomberg dishwashers are manufactured with the best stainless steel materials available, which not only protect dishwashers from heat and corrosion, but also sanitize your dishes with one of the highest washing temperatures available (167°F) in the dishwasher market.

Flow through heater
The heater is concealed to provide a safer and more convenient alternative to the conventional exposed heater. This allows plastic dishware to be placed on both top and bottom racks without damage.

Pots and pans plus 167°F
The pots and pans plus program offers a technology that cares for your dishes and guarantees exceptional cleaning of the most soiled dishes at 167°F temperature.

3 way euro filtering system
The 3 way euro filtering system removes even the smallest dirt particles and ensures circulation of clean water.

Silent operation
By utilizing three layers of insulation including bituminous material, cotton insulation and side walls, Blomberg dishwashers are among the most quiet in the market. With advanced motor technology introduced at Blomberg models, noise levels are so low that you don’t even have to run your dishwasher late at night.

DMFS
All Blomberg dishwashers have a double motion float system (DMFS) and a bottom tray to prevent flooding. DMFS is an enhanced anti-leak system designed to provide maximum security against water damage. It is an intelligent mechanism that detects the source of excess water collection, the first float activates the drain pump, and the machine continues to run until the cycle is complete. If there is an operational problem, the second float level is involved to shut off the valve to stop water intake and drain the existing water until all the water inside the machine is discharged.

Due to the continual improvements achieved through research and development, Blomberg reserves the right to make any changes to the specifications and features of products without prior notice. As a result, you may find differences between the product as described in the catalog and the product you receive.
IN HARMONY WITH YOUR LIFE

With over 130 years of production and expertise in the appliance and metal industries, Blomberg is a quality name in the European household appliance market. Owned by Arçelik, the 3rd largest appliance manufacturer in Europe, Blomberg has gained a sizeable presence in the European home. For years Blomberg has been setting trends in both technology and style and continues to employ technologically advanced appliances, while still keeping the everyday family life in mind. Blomberg has introduced an outstanding collection of tall tub dishwashers with advanced German engineering and state-of-the-art design. All Blomberg dishwashers are ENERGY STAR qualified to conserve energy and save you money. Blomberg’s 5 level wash system and 167°F water temperature will make your dishes sparkling clean. All dishwasher models are extra quiet, dependable and backed by an exceptional warranty.

IN HARMONY WITH NATURE

ENVIRONMENTALLY FRIENDLY

Maximum energy efficacy
All Blomberg products are ENERGY STAR qualified, offering you cleaner dishes while saving you money and energy.

Brushless DC™ Motor
Brushless DC™ Motor is an electric controlled innovative pump technology designed for the efficient use of natural resources and of your time.

Harmless components
Blomberg dishwashers are not only energy efficient but also RoHS compliant. The products are built of 99.9% lead-free materials, and 85% of our components are recyclable.

IN HARMONY WITH YOU

PRACTICAL

Electronic controls
The electronic LCD display offers you a quick and easy way to select your programs. Additionally, products with hidden control panel offer an adjustable “end of cycle audible signal”, which reminds you that your wash cycle has finished and the dishes are ready to use. Also, the hidden control panel prevents your children from changing programs and playing with your dishwasher.

Time saving
Blomberg understands that your time is precious and provides a 30-minute quick wash program alternative for your lightly soiled dishes.

Turbo fan drying
The additional fan included in some of the models will improve the drying performance of your dishwasher by means of active ventilation at the end of the washing cycle.

Inner illumination
Blomberg models at DWT57500 series are equipped with a brilliant interior white LED light activated with door opening and allowing you to see all dishes even in dark environment.

ALL IN

Blomberg dishwashers perform well with all types of compact detergents.
IN HARMONY WITH YOU

EASY TO LOAD

**FlexiDrawer removable 3rd rack**
Some models feature a third rack to create extra space for your cutlery and espresso cups. What makes this rack special is that it still allows you to place tall stemware on the sides of the upper dishwasher basket. It can be completely and easily removed should you prefer to place tall objects in the middle of the upper rack as well.

**Flexible upper rack**
*Multi flex racks with flip down tines* in the lower rack and *smartFOLD™* plate supports in the upper rack have been designed to maximize space in your dishwashers, allowing large items to be easily washed. With the flip down shelves you maximize space by using lower and upper parts of the shelf at the same time. You can wash long utensils and cappuccino/espresso cups all together, increasing capacity. What’s more, the flip down shelves in the upper rack can be positioned at different levels allowing you to wash tall champagne flutes with short brandy glasses.

**Height-adjustable upper rack**
Blomberg dishwashers all have a height-adjustable upper rack, which can be raised to make room for pans, platters and baking trays in the bottom rack or lowered to accommodate tall glasses. Available in some models is *FlexiRack*, which allows you to adjust the rack height in one simple action even when the rack is fully loaded.

**Full folding tines for the lower rack**
Some Blomberg models have full flat lower basket to enable proper placing for large pots and pans. This way pots and pans are cleaned thoroughly.

**Sliding cutlery basket**
Your Blomberg dishwasher’s cutlery basket can be replaced anywhere in the front row of the dishwasher by simply sliding it from side to side.
**smartFIT™ and smartBALANCE™**
Blomberg developed a height adjustment mechanism called smartFIT™, which allows the rear feet to be adjusted from the front. In addition, fully integrated Blomberg dishwashers have a front adjustable hinge system, smartBALANCE™, which helps to achieve a perfectly balanced door by adjusting the dishwasher springs to the weight of your kitchen cabinet door panel.

**5 level wash**
The 5 level wash system ensures immaculately clean dishes. The two spray arms, placed in the bottom and the middle of the dishwasher, and the third spray arm at the top spray water from every direction, reaching even the most remote parts of your dishes.

**Built-in water softener**
Available in some models, the Blomberg water softener can help you reduce your water hardness to a manageable level and prevent your glasses and dishes from being etched.

**Auto wash**
Using an advanced sensor technology, Blomberg’s sensor management system automatically monitors the soil level of your dishes and operates at the right temperature and length of time to deliver perfect washing results with optimum water and energy consumption. Just place your dishes in the machine, choose the auto wash cycle, and the job is as good as done.

**Silent operation**
By utilizing three layers of insulation including bituminous material, cotton insulation and side walls, Blomberg dishwashers are among the most quiet in the market. With advanced motor technology introduced at Blomberg models, noise levels are so low that you don’t even have to run your dishwasher late at night.

**Stainless steel tank**
Blomberg dishwashers are manufactured with the best stainless steel materials available, which not only protect dishwashers from heat and corrosion, but also sanitize your dishes with one of the highest wash temperatures available (167°F) in the dishwasher market.

**Flow through heater**
The heater is concealed to provide a safer and more convenient alternative to the conventional exposed heater. This allows plastic dishware to be placed on both top and bottom racks without damage.

**Pots and pans plus 167°F**
The pots and pans plus program offers a technology that cares for your dishes and guarantees exceptional cleaning of the most soiled dishes at 167°F temperature.

**3 way euro filtering system**
The 3 way euro filtering system removes even the smallest dirt particles and ensures circulation of clean water.

**DMFS**
All Blomberg dishwashers have a double motion float system (DMFS) and a bottom tray to prevent flooding. DMFS is an enhanced anti-leak system designed to provide maximum security against water damage. It is an intelligent mechanism that detects the source of excess water collection, the first float activates the drain pump, and the machine continues to run until the cycle is complete. If there is an operational problem, the second float level is involved to shut off the valve to stop water intake and drain the existing water until all the water inside the machine is discharged.

* Lead-free
Due to the continual improvements achieved through research and development, Blomberg reserves the right to make any changes to the specifications and features of products without prior notice. As a result, you may find differences between the product as described in the catalog and the product you receive.
With over 130 years of production and expertise in the appliance and metal industries, Blomberg is a quality name in the European household appliance market. Now owned by Arçelik, the 3rd largest appliance manufacturer in Europe, Blomberg has gained a sizeable presence in the European home. For years Blomberg has been setting trends in both technology and style, and continues to employ technologically advanced appliances, while still keeping the everyday family life in mind. As a widely recognized international name, Blomberg has established itself in North America with an ever-expanding line of appliances that have superior features and quality. In the coming years, Blomberg has its sights set on becoming a leading brand in the United States and Canada, just as it has been in Europe for so many years. Blomberg has introduced an outstanding collection of refrigerators with advanced German engineering and state-of-the-art designs.

### Harmless components
Blomberg refrigerators are not only energy efficient but also RoHS compliant. The products are built of 99.9% lead-free materials and 85% of our components are recyclable.

### Maximum energy efficiency
All Blomberg products are ENERGY STAR qualified, offering you cleaner laundry while saving you money and energy. Some Blomberg fridges are recognized by Environmental Protection Agency (EPA) most distinguished ENERGY STAR® Most Efficient 2014 mark for the year 2014.

### Four-door french door
Blomberg four-door french door refrigerator, BRFD 2650 SS, have been designed to provide maximum cooling advantages. With 80 cm (31 ½ inch) wide shelf space, it has the largest cooling area for easy and ergonomic use of the refrigerator. For maximum flexibility, you can set the temperature of the special cool & freeze zone from -10°F to +50°F. You can use this 77-litre (2.7 cu.ft) compartment as a freezer, super fresh zone or a fresh food compartment depending on your storage needs.

This special four-door french door refrigerator features Blomberg’s trio-cycle no frost technology, which provides separate air circulation in the freezer, the fresh food compartment and the flexi zone by means of three separate fans. This separate air movement prevents odor blending, leads to a more homogenous air distribution for better preservation of food delivering at the same time more energy efficiency and silent cooling.

### Duo cycle no frost technology
Certain Blomberg fridge freezers, are equipped with an advanced duo-cycle no frost technology which provides more homogenous, energy efficient, and silent cooling.

In conventional frost free systems, a fan provides constant air flow between the freezer and fresh food compartments. One of the most common problems of this system is odor mixing between the compartments. In Blomberg’s duo-cycle frost free technology, two fans – one for the freezer and another for the fresh food compartment – provide separate air circulation.

In other words, there is no air transfer between the freezer and fresh food compartments. By means of this separate air movement, the air in the freezer section does not mix with the air in the fresh food section, eliminating odor mixing.

This duo-cycle air circulation also leads to a more homogenous air distribution for better preservation of food items. Since the freezing air circulates only in the freezer compartment, food is frozen faster in comparison to conventional freezers. In addition, the separate air circulation leads to lower temperature fluctuation in the fresh food compartment for longer preservation of food. Furthermore, noise level is reduced to a very low level for a peaceful environment in your kitchen.

### Frost Free
Certain Blomberg fridge-freezers keep fruits and vegetables fresher for longer periods of time. Frost free cooling system creates a permanent cold environment, eliminating build-up of ice and bacteria in the freezer, and avoids unpleasant fridge odours. You will find food packs don’t stick together. Best of all, there is no need to manually defrost the freezer.
Maximum space

Flexi rack, a flexible suspended chrome bottle holder featured in certain refrigerators, is a practical accessory. It is located just below the glass shelves. It provides extra storage space for bottles and it is ideal for cooling wine and tall bottles of water.

Inner digital display

Inner digital display featured in Blomberg BRFB 1800 series allow accurate temperature settings. Furthermore, models that include automatic ice machine have a special function over display where you can stop and initiate the ice making process.

Automatic ice machine

BRFB 1800 SSIM and BRFB 1800 WHIM models features automatic ice machine where your ice will be ready with a single step. All you have to do is pour water in the reservoir and your machine will prepare and store the ice in tray.

Glass shelves

The shelves within the Blomberg cooling range are made of safety glass, and are highly impact resistant. They help to prevent food and beverages spilling onto lower shelf, making cleaning easier.

Robust handle

Blomberg cooling products are equipped with robust aluminium handles that gives your product an elegant look.

Transparent drawers

The front of the crisper and freezer drawers in blomberg refrigerators are transparent, so that you can see the contents clearly without opening the drawers saving time and minimizing energy loss.

Illumination with white LED

Majority of the models in the Blomberg range feature illumination with white LED for a more aesthetic look inside your fridge and less energy consumption.
## Antibacterial door gaskets
The refrigerator door gaskets provide an ideal environment for bacteria formation creating a health hazard for you and your family. For maximum hygiene inside your refrigerator, Blomberg coated the refrigerator door gaskets with an antibacterial seal that eliminates bacteria.

## Blue light technology
Blomberg’s exclusive blue light technology allows fruit and vegetables to continue photosynthesis while in the fridge. The blue zone is a special crisper illuminated with blue light, which is essential for healthy plant development. Through a constant supply of blue light rays, your Blomberg refrigerator will maintain the vitamin value of fruit and vegetables so you can have them fresher and juicier for longer.

## HygAIR ionizing technology
The exceptional HygAIR technology, inherent in select Blomberg refrigerators, is developed to bring freshness of the pine forests to your kitchen. The HygAIR technology eliminates airborne bacteria and odour forming molecules, by producing natural negative ions inside the cabinet. These ions capture microorganisms, and transfer them out of the refrigerator via the defrost process. As a result, your food stays fresher for longer, and you can smell nature in your fridge.

## Hygiene+ antibacterial carbon filter
Present in some fridges, is the photo catalyst carbon filter, which eliminates bacteria potentially present in the refrigerator, working in conjunction with the air-cooling systems of the no frost or static models (with built-in fans). This ensures permanently high levels of hygiene, protection from bacteria build-up, and reduced fridge odour. The carbon filter can be reactivated easily, with just one day’s exposure to sunlight.

IN HARMONY WITH YOUR LIFE

With over 125 years of production and expertise in the appliance and metal industries, Blomberg is a quality name in the European household appliance market. Now owned by Arçelik, the 3rd largest appliance manufacturer in Europe, Blomberg has gained a sizeable presence in the European home. For years Blomberg has been setting trends in both technology and style, and continues to employ technologically advanced appliances, while still keeping the everyday family life in mind. As a widely recognized international name, Blomberg has established itself in North America with an ever-expanding line of appliances that have superior features and quality. In the coming years, Blomberg has its sights set on becoming a leading brand in the United States and Canada, just as it has been in Europe for so many years.

IN HARMONY WITH NATURE

ENVIRONMENTALLY FRIENDLY

Maximum energy efficiency
All Blomberg washers are ENERGY STAR qualified, offering you cleaner laundry while saving you money and energy. All Blomberg washers and dryers are not only energy efficient but also RoHS compliant.

Maximum water efficiency
All Blomberg washing machines are equipped with the automatic water adjustment system, which enables your machine to adjust its water intake based on the amount of the laundry for conservation of water resources.

IN HARMONY WITH YOU

PRACTICAL

Electronic controls
All Blomberg washing machines have ergonomically positioned control panels, fully electronic controls and intelligent programmes operated via a single dial, for simple programme selection. Washing with an LCD controlled machine makes laundry care easy; just press "start" and go. The machine helps you by suggesting the correct temperature and spin speed according to the selected programme and you can either accept the suggestion or choose your own settings.
SMART PROGRAMS

**WASHER**

In addition to soak, spin and drain options, Blomberg washers feature special programs engineered for different fabrics.

**Cottons / Regular**
For the care of your cotton garments, Blomberg washers feature a choice of programs with wash temperatures ranging from 60°F to 165°F. The cold cycle is for lightly soiled cottons while the sanitary cycle provides maximum hygiene for highly soiled clothes.

**Permanent Press**
To ensure safe cleaning of synthetic fibers, Blomberg washers offer three different alternatives from cold to hot according to the dirt level of your laundry. Furthermore, your machine limits the spin speed to 800 rpm for a longer fabric life.

**Delicates**
To ensure safe cleaning of synthetic fibers, Blomberg washers offer three different alternatives from cold to hot according to the dirt level of your laundry. Furthermore, your machine limits the spin speed to 800 rpm for a longer fabric life.

**Handwash**
Handwash cycles allow the safe wash of fabrics such as silks and cashmere. These programs wash gently with a slow and even drum movement that delivers highly efficient cleaning while caring for and extending the life of clothes. With the intelligent control system, your washer automatically limits the spin speed to 600 rpm, and for complete handwash protection the cycle will not allow you to select any function, which may damage your clothes.

**Wool**
To extend the life of woolens, Blomberg washers feature special wool wash cycles, which gently rock your clothes to and fro and limit the spin speed to 600 rpm.

**DRYER**

For different laundry needs, the Blomberg dryer offers flexible program options.

**Cottons / Regular**
This program is ideal for durable cottons such as sheets. You have the option of choosing the drying level between damp, regular and extra dry alternatives.

**Permanent Press**
For less durable fabrics, Blomberg features the permanent press cycle, which dries the laundry at a lower temperature. This program is ideal for synthetic clothes.

**Delicates**
Delicate drying is a special cycle for your delicate laundry items where the drying time is limited to 30 minutes.

**Refresh**
The refresh cycle is a freshen-up program that eliminates odors in clothes, without having to wash them.

**Timed Programs**
To achieve the desired final drying level, the Blomberg dryer features 15, 30 and 60-minute timed program options. Regardless of the dryness level of the laundry, the cycle continues to dry at a low temperature for the duration chosen.

**Mixed Fabrics**
This program is specially designed for clothes made of different types of fabric. It provides low-temperature, gentle drying for longer garment life.
SAFE

**Rinse sensor**
Designed specially for Blomberg washers, this system measures the excessive foam in the laundry and automatically adjusts the rinse cycle for a perfect result. Sensorinse ensures efficient rinsing and prevents risks of irritation to sensitive skins and white traces on dark coloured textiles.

**Internal water heater**
Blomberg washers are equipped with internal water heaters, which enable higher water temperatures for better washing results and the total hygiene of cottons and baby clothing.

**Liquid detergent compartment**
Blomberg offers special liquid detergent compartment for washing of different kinds of textiles like wool, silk and colorful laundries.

**Child lock**
For maximum security Blomberg washers and dryers have a child-resistant control panel. Once the child lock is activated, any alteration to the selected settings is ignored, so little fingers can’t upset your wash.

PRACTICAL WASHING

**Special functions**
Blomberg washing machines offers auxiliary functions in the aim of providing for a better care of your laundry.

- **Super wash** function chooses the best washing option and increases the wash duration to avoid even the toughest stains from clothes.
- **Extra rinse** function provides more rinse cycles, which prevents risks of irritation to sensitive skins and white traces on dark colored clothes.
- **Anti Crease** function reduces creases while washing the clothes.
- **Soak** function soaks the laundry in a relatively high amount of warm water to pre-treat them before washing.
Flexible Placement
Stacking kit is an easy and safe way to keep the aesthetic harmony between washing machine and dryer. It’s so simple to install the kit that you can even do it by yourself practically at home.

Easy access to lint filter
Extra large lint filter collects the lint that is produced during the cycle. It is located on the front of the machine allowing easy access. With its wide handle removing and cleaning the filter is an easy task. Also, large surface area of the filter improves the drying performance of the dryer.

Bi-directional drum action
The bi-directional drum action ensures that your laundry dries evenly.

Special drum paddles
The special drum paddles with their unique form ensure more homogenous drying as well as less creasing. Moreover, you will not be facing any tangling problems especially for bulky items, such as bed sheets.

Anti-crease
The anti-crease cycle separates and smoothes your laundry after the drying cycle by means of a gentle drum action, so it’s wrinkle-free and ready to wear.

## TECHNICAL DETAILS

### WM 87120

#### FEATURES
- **Drum volume**: 2.15 cuft
- **Dry load capacity**: 8 kg (17.6 lb)
- **Maximum spin speed**: 1200 rpm
- **Variable spin speed**
- **Control**: Electronic display
- **Time delay**: 0-24h
- **Remaining time indicator**
- **Program follower**
- **Automatic water adjustment system**
- **Automatic detergent dispensing system**
- **Automatic temperature control**
- **Sensor in suds detection system**
- **Unbalance detection system**
- **Euro wash system with internal water heater**
- **Child lock**
- **Drum material**: Stainless Steel

#### PROGRAMS
- **Number of programs**: 12
- **Cottons / regular wash**
- **Permanent press**
- **Hand wash**
- **Delicates**
- **Wools**
- **Drain**
- **Soak**
- **Spin**
- **Spin and drain**

#### FUNCTIONS
- **Super Wash**
- **Soak**
- **Extra rinse**
- **Anti Crease**

#### DIMENSIONS
- **Product Dimensions (HxWxD)**: 33 1/8 x 23 3/8 x 24 3/8 in (84 x 59,5 x 62 cm)
- **Packed Dimensions (HxWxD)**: 34 5/8 x 25 5/8 x 26 in (88 x 65 x 66 cm)
- **Product Weight**: 77 kg (170 lbs)
- **Packed Weight**: 80 kg (176 lbs)

#### TECHNICAL FEATURES
- **Voltage**: 208-240V / 60Hz

### WM 77110

#### FEATURES
- **Drum volume**: 1.95 cuft
- **Dry load capacity**: 7 kg (15.4 lb)
- **Control**: LED
- **Program follower**
- **Child lock**
- **Clean filter indicator**
- **Bi-directional drum action**
- **Glass door with heat protection**
- **Reversible door**
- **Drum material**: Stainless steel

#### PROGRAMS
- **Number of programs**: 15
- **Cottons / regular wash**
- **Permanent press**
- **Mixed fabric**
- **Delicates**
- **Refresh**
- **Timed programs**: 15-30-75 min

#### FUNCTIONS
- **Low heat**
- **Auto anti-creasing**
- **Auto cool-down phase**
- **End of cycle buzzer**

#### DIMENSIONS
- **Product Dimensions (HxWxD)**: 33 1/2 x 23 3/8 x 21 1/4 in (85 x 59,5 x 54 cm)
- **Packed Dimensions (HxWxD)**: 35 x 26 3/8 x 23 3/8 in (89 x 67 x 59,5 cm)
- **Product Weight**: 35.5 kg (79 lbs)
- **Packed Weight**: 40 kg (89 lbs)

#### TECHNICAL FEATURES
- **Voltage**: 208 - 240V / 60Hz

### ELECTRICAL STANDARDS
- **Energy star qualified**
- **RoHS** compliant

### PRGRAMME DURATION (MIN-AVERAGE)
- **Jeans**: 30 min
- **Delicates**: 30 min
- **Damp Dry**: 15 min
- **Regular Dry**: 15 min
- **Extra Dry**: 75 min
- **Refresh**: 15 min
- **Mixed Fabric**: 15 min
- **Shirts**: 15 min

### STACKING KITS
- **Kit-1 (Universal Stacking Kit)**: Can be mounted with all WM with any depth
- **Kit-2**: Can be mounted with all WM with 50-54-60 cm depth

### COLOUR
- **White**
Due to the continual improvements achieved through research and development, Blomberg reserves the right to make any changes to the specifications and features of products without prior notice. As a result, you may find differences between the product as described in the catalog and the product you receive.
IN HARMONY WITH YOUR LIFE

With over 125 years of production and expertise in the appliance and metal industries, Blomberg is a quality name in the European household appliance market. Now owned by Arçelik, the 3rd largest appliance manufacturer in Europe, Blomberg has gained a sizeable presence in the European home.

For years Blomberg has been setting trends in both technology and style, and continues to employ technologically advanced appliances, while still keeping the everyday family life in mind. As a widely recognized international name, Blomberg has established itself in North America with an ever-expanding line of appliances that have superior features and quality. In the coming years, Blomberg has its sights set on becoming a leading brand in the United States and Canada, just as it has been in Europe for so many years. Blomberg has introduced an outstanding collection of cookers with advanced German engineering and state-of-the-art designs.

IN HARMONY WITH NATURE

ENVIRONMENTALLY FRIENDLY

Environmental friendly
Preservation of natural resources is a priority for Blomberg, where not only our production facilities are environment-conscious, but also all our products. All Blomberg wall ovens are not only energy efficient but also RoHS compliant. The products are built of 99.9% lead-free materials, and 85% of our components are recyclable.

IN HARMONY WITH YOU

PRACTICAL

3D cooking
3D cooking is an advanced convection system that uses an additional heating element, which surrounds the cooking fan located at the back of the oven, for a three-dimensional cooking effect. Through constant air circulation, food is cooked more uniformly throughout. This function allows you to cook large pieces such as big turkey or meat perfectly.

Robust handle
All Blomberg ovens feature the robust, elegantly finished straight stainless handle. The same handle is used in other Blomberg appliances such as refrigerators and dishwasher line-up in order to create an uniform look in your kitchen.

Programmable electronic timer
Blomberg ovens feature electronic timers that show the time of day and allow you to pre-set the start time, duration or end of cooking. When the set cooking time ends, the oven switches itself off automatically, and warns you with an audio signal.
<table>

Easy Clean enamel
Blomberg oven cavities are coated with Easy Clean, exclusive, non-porous, grey enamel. This long lasting finish gives an elegant look and allows easy, quick and ecologic cleaning of the oven cavity and trays.

Smooth cavity
With no visible screws or connection points, the surface of the Blomberg oven cavity is smoother than ever. The smooth surface eliminates the risk of food and dirt particle collection and enabling the cleaning very easily.

Easy-to-remove side racks
Blomberg ovens are equipped with easy hand removable wire racks, which provide effortless access to the oven sidewalls, enabling complete cavity cleaning with minimal effort.

Full glass door with large window
Blomberg ovens are designed with a wide, transparent glass window to allow you to see the oven interior without having to open its door, avoiding heat and energy loss during the cooking cycle. Additionally the door has multiple glass panels to keep the full heat inside the oven and reflect minimum heat outside of the unit when cooking is in progress. All models have easily removable doors for a thorough wipe of the door itself or to allow easy access to the oven cavity. In certain models the glass window is also removable to allow you to clean the glass separately.

Stylish details
By concealing the top heater, Blomberg has not only maximized the cooking space but also gave it a smooth elegant look inside the wall oven. The special Easy Clean grey enamel coating is another stylish design element featured on Blomberg ovens.
Large cavity
Blomberg BWOS24100 and BWOS24200 models have extended cavities by up to 20% to maximize the joy of cooking and dining. Blomberg ovens offer one of the largest spaces in the market in this class with 65-litre (2.3 cuft) cavity for conventional and multifunction ovens and they come with bigger sized trays. You no longer have to worry about fitting the Thanksgiving turkey in your oven or the tray. Additionally three separate dishes can be cooked at the same time by placing each to any 5 different levels in the cavity.

Fan cooking
The circular heater and the fan motor operate together. This function allows heat to be distributed evenly in the center of our oven. In this setting, you can cook 3 different dishes at the same time without blending their flavours or aromas.

Interior lighting
To allow you thorough and easy observation of the cavity, Blomberg ovens feature interior lighting with cylindrical lamps placed on the rear wall. Grey-coloured cavity surface reduces reflection on the glass doors.
PRACTICAL COOKING WITH CERAMIC COOKTOPS

Elegant design
Blomberg ceramic cooktops have scratch-free, easy-to-clean smooth surfaces providing clean and modern looks thanks to their frameless finish.

Safe
To inform you that the cooking zone is not cool enough to touch safely, the residual heat indicators warn you with a visible red indicator on the cooktop surface. The child lock prevents children from changing the cooking settings by locking the controls. The overflow protection system automatically shuts off the power in case of liquid boiling over onto the control panel. Also, the cooktop automatically switches itself off if the zone is left on for a long period of time.

Easy controls
Blomberg electric cooktops have touch slider or touch-sensitive front controls that are practical and allow precise temperature settings. Each heating zone is also operated by a separate touch point so that power levels on each individual cooktop can easily be regulated.

Fingerprint free stainless steel
A selection of stainless steel models in the range have fingerprint free panel and doors, so you won’t have to worry about leaving behind a mark.

Timer
Blomberg CTE 36500 model has a timer that allows you to set a cooking time for each cooking zone separately. When the cooking time is up, the cooktop will automatically switch off the zone and a buzzer will signal the end of cooking.

## TECHNICAL DETAILS

### BUILT-IN OVENS
- **Model Numbers:** BWOS 30100, BWOS24100, BWOS24200
- **Series:**
  - Type: Built-in Oven
  - Size: 30" 24" 24"
  - Colour: Stainless Steel
  - Oven Type // Upper Oven Type:
    - Multifunction (True Euro Convection)
  - Control type: Electronic

### FUNCTIONS
- **Pyrolitic Self-Clean with automatic door latch:** Yes
- **True European Convection Bake (ring element):** Yes
- **Convection Broil:** Yes
- **Convection Roast:** Yes
- **Bake:** Yes
- **Broil:** Yes
- **Dehydrate:** No
- **Fast Preheat:** Yes
- **Defrost:** No

### SPECIAL FEATURES
- **Automatic Fast Preheat:** Yes
- **Electronic Lock:** Yes
- **Sabbath mode:** Yes
- **12/24 hours clock format:** Yes
- **°C/°F degree unit:** Yes

### OVEN DOOR
- **Oven Glass Window:** Large See Through Glass
- **Door Cooling System:** 4 Pane Heat Resistant Glass

### OVEN CAVITY
- **Net Capacity:** 78 lt / 2,8 cuft
- **Cavity Enamel Colour:** Black
- **Rack Positions:** 4 embossed
- **Oven Lights:** 2x20W Halogen
- **Broil Upper Heating Element:** 3500W (240V)
- **Upper Auxiliary Element Wattage:** 1032W (240V)
- **Concealed Bake Lower Heating Element:** 3000W (240V)
- **Convection Element Wattage:** 2500W (240V)

### ACCESSORIES
- **Chromed racks:** 22

### DIMENSIONS / WEIGHT
- **Overall dim - width:** 29 3/8” (745 mm)

In the coming years, Blomberg has its sights set on becoming a leading brand in the United States and Canada, just as it has been in Europe for so many years. Blomberg has introduced an outstanding collection of cookers with advanced German engineering and state-of-the-art designs. All Blomberg cookers have an easy clean enamel and full width glass inner door, both allows for easy cleaning to help to keep your oven looking new and clean. Additionally, 24100 model series come with a true European convection system for a three-dimensional cooking system.

**IN HARMONY WITH YOUR LIFE**

**IN HARMONY WITH NATURE**

**ENVIRONMENTALLY FRIENDLY**

Environmental Friendly
Preservation of natural resources is a priority for Blomberg, where not only our production facilities are environment-conscious, but also all our products. All Blomberg cookers are not only energy efficient but also RoHS compliant. The products are built of 99.9% lead-free materials, and 85% of our components are recyclable.

**IN HARMONY WITH YOU**

**PRACTICAL**

**3D cooking**
3D cooking is an advanced convection system that uses an additional heating element, which surrounds the cooking fan located at the back of the oven, for a three-dimensional cooking effect. Through constant air circulation, food is cooked more uniformly throughout. Furthermore, it is possible to cook three different dishes at the same time without mixing their flavours or aromas.

**Cast Iron Grates**
Stylish and elegant design of cast iron grates will not only show Blomberg gas range a close to pro-look, but also provide maximum durability and safety enabling use of various sizes of pots and pans over the range top.

**Programmable electronic timer**
Blomberg cookers feature electronic timers that show the time of day and allow you to pre-set the start time, duration or end of cooking. When the set cooking time ends, the oven switches itself off automatically, and warns you with an audio signal.
Side racks
Blomberg ovens feature side racks designed to make cleaning easy and effortless. It is supported by easily removable wire racks allowing easy access to the cavity ceiling and the oven sidewalls.

Glass inner surface
A full glass inner surface of the oven door is a special feature in top-of-the-range Blomberg cooking appliances. The oven doors feature three layers of glass to minimise the external temperature of the oven while also reducing heat loss. These layers, incorporated in a single sheet of glass, allow easy cleaning and can be safely used to place plates and dishes on. The oven door can also be easily removed for a quick reach to the oven cavity.

Interior lighting
To allow you thorough and easy observation of the cavity, Blomberg ovens feature interior lighting with cylindrical or square lamps placed either on the rear wall or on side walls. Grey-coloured cavity surface reduces reflection on the glass doors. Halogen lamps, available with certain models, provide more energy-efficient and brighter white lighting. In specific models, the oven light is automatically activated when the door is opened for immediate visibility.

Easy Clean grey enamel
All Blomberg oven cavities are coated with exclusive, long lasting, non-porous enamel, which is attractive and makes cleaning extremely easy—a damp cloth is all you need!

Blomberg also coats the baking trays with Easy Clean grey enamel, to help keep your oven looking new and clean.
Blomberg cookers offer a wide choice of heating methods providing ideal cooking options for all types of food.

**Hidden top heater**

The top heater in Blomberg ovens is hidden eliminating the risk of self injury while reaching the top shelf. In addition, it minimizes the temperature of the oven handle and knobs for a safe touch.

**Quality tested**

All units leaving the factory are 100% tested for performance and quality purposes. This ensures a safe and a well performing unit in use for years to come.

**Residual heat indicators**

Residual heat indicators on the ceramic glass cook top warn you if the cooking zone is not cool enough to touch safely.

**Flame failure safety device**

All Blomberg gas cooking burners are equipped with a flame failure safety device. If flame accidentally extinguishes, the flame safety device will cut the gas supply automatically preventing any leakage of gas.

**Bottom heater**

Only the bottom heater is in operation. This function is ideal for slow cooking and for baking pizza and pastries where the base needs more crisping than the top.

**Conventional**

The top and bottom heaters are in operation. The bottom heater will cook the base and the middle of the food while the top heater is used for browning. This function is ideal for stews, casseroles, pastries and meats.

**Grill**

The full grill is in operation. This function is ideal for grilling and browning larger quantities of food.

**Fan cooking**

The circular heater and the fan motor operate together. The heat in the oven is distributed evenly in the centre. In this setting, you can cook 2 or 3 different foods that require the same or similar temperature settings.

**Grill+fan**

The full grill and fan motor operate together. This function is ideal for lean meats and fish.

**Conventional+fan**

The bottom and top heaters operate together with the fan motor. This function is ideal for using the whole oven, with particular focus on browning and base heat.

**Defrost**

The fan motor is in operation. This function is ideal for defrosting delicate foods like cakes and pastries.

**3D cooking**

Top, bottom and central heaters operate together with the fan motor. This function allows you to cook 3 separate dishes at the same time without blending their flavours or aromas.
**Easy-glide storage drawer**
The robustly designed storage drawer is ideal for the storage of oven accessories. Furthermore, with its side rollers and easy-glide mechanism it is easy to use.

**Electronic ignition integrated into the knob**
Igniting Blomberg gas burners is much quicker and easier with the integrated knob ignition system. Simply press and turn the dial for instant auto ignition and you are ready to cook.
**Smooth cavity**
With no visible screws or connection points, the surface of the Blomberg oven cavity is smoother than ever. The smooth surface eliminates the risk of food and dirt particle collection, hence, facilitating cleaning.

**Large cavity**
We have expanded our cavities by up to 20% to maximize the joy of cooking and dining. Blomberg ovens offer one of the largest spaces in the market with 65-litre cavity for conventional and multifunction ovens, respectively, and they come with bigger sized trays. You no longer have to worry about fitting the Christmas turkey in your oven or the tray. And, you can cook a whole meal of 3 separate courses all at once using any 3 of our 5-level shelves.
**MODELS**

**BERU/BERC 24100 SS**

- **60 cm (24”) Convection Electric Range**
  - Convection Range
  - Smoothtop cooking zones
  - Oven Cavity
    - Digital Programmable Timer
    - 65l (2.3cuft) oven cavity
    - 8 Functions: Defrost, Static, Static+Fan, Fan heating (Turbo), Bottom heater, Low Grill + Fan, Grill, 3D
    - Closed Door Grilling
    - Easy clean Grey Enamel
  - Hob
    - 4 Vitroceramic burners:
      - Q120/210mm 1800W = 4.7/8.2 inch (double zone)
      - Q160mm 1500W = 6.3 inch
      - Q210 mm 2200W = 8.3 inch
  - Additional Features
    - Easy glide storage drawer
    - Adjustable Feet
  - Accessories
    - Wire Shelf
    - Splash Back - stainless (Included)
  - Technical Information
    - Dimensions (HxWxD): 900 x 600 x 600mm
    - Net Weight: 130lb / 59kg
  - Colour
    - BERC 24100 SS: Stainless Steel (Canada) with 40 A power cable
    - BERU 24100 SS: Stainless Steel (USA)

**BERU/BERC 24100 B**

- **60 cm (24”) Convection Electric Range**
  - Convection Range
  - Smoothtop cooking zones
  - Oven Cavity
    - Digital Programmable Timer
    - 65l (2.3cuft) oven cavity
    - 8 Functions: Defrost, Static, Static+Fan, Fan heating (Turbo), Bottom heater, Low Grill + Fan, Grill, 3D
    - Closed Door Grilling
    - Easy clean Grey Enamel
  - Hob
    - 4 Vitroceramic burners:
      - Q180mm 1800W = 7 inch
      - Q140mm 1200W = 5.5 inch
    - Q210 mm 2200W = 8.3 inch
  - Additional Features
    - Easy glide storage drawer
    - Adjustable Feet
  - Accessories
    - Wire Shelf
    - Splash Back - stainless (Included)
  - Technical Information
    - Dimensions (HxWxD): 35.4” X 23.6” X 23.6”
    - Net Weight: 130lb / 59kg
  - Colour
    - BERC 24100 B: Black (Canada) with 40 A power cable
    - BERU 24100 B: Black (USA)
### 60 cm (24") Non-convection Electric Range

**Non-Convection Range**
- Smoothtop cooking zones

**Oven Cavity**
- Mechanic Timer
- 67.5l (2.4cuft) oven cavity
- 4 Functions: Bottom and Upper Heater, Bottom Heater, Low Grill, Grill
- Closed Door Grilling
- Easy clean Grey Enamel
- Oven light
- Full width glass inner door

**Cooking Zones**
- 4 Vitroceramic burners:
  - 80mm 1800W = 7 inch
  - 80mm 1200W = 5.5 inch
  - 80mm 1200W = 5.5 inch
  - 85mm 2200W = 8.3 inch

**Additional Features**
- Flap door storage
- Adjustable Feet

**Accessories**
- Wire Shelf
- Splash Back - stainless (Optional)

**Technical Information**
- Dimensions: (HxWxD): 35.4" X 23.6" X 23.6"
- Dimensions: (HxWxD): 900 X 600 X 600mm
- Net Weight: 146lb / 66kg

**Colour**
- BERU 24200 SS: Stainless Steel (USA)
- BERC 24200 SS: Stainless Steel (Canada) with 40 A power cable

### 60 cm (24") Gas Range

**Gas Range**
- Gas Burners

**Oven Cavity**
- 65l (2.3cuft) oven cavity
- Gas Grilling
- Easy clean Grey Enamel
- Oven light
- Full width glass inner door

**Cooking Zones**
- 4 gas burners:
  - 2900W=10000btu
  - 2000W=7000btu
  - 1000W=3500btu
  - 2000W=7000btu

**Additional Features**
- Adjustable Feet

**Accessories**
- Wire Shelf

**Technical Information**
- Dimensions: (HxWxD): 35.4" X 23.6" X 23.6"
- Dimensions: (HxWxD): 900 X 600 X 600mm
- Net Weight: 134.5lb / 61kg

**Colour**
- BGR 24100 SS: Stainless Steel

**Functions**
- Multi-dimensional Cooking: Yes
- Conventional Cooking: Yes
- Bottom Heater: Yes
- Fan: Yes
- Low Grill: Yes
- Grill: Yes
- Fan + Grill: Yes
- Fan + Bottom + Top Heater: Yes
- Fan heating (Turbo): Yes

**Special Features**
- 12/24 hours clock format: Yes
- Splash Back: Optional
- Cooling Fan: Yes
- Cavity Enameling Colour: Grey
- Oven Lights: 1x25W
- Adjustable Feet: Yes
- Anti-tip (tilting) bracket: Yes
- Bottom Compartment / Storage Drawer: Drop down

**Gas Type**
- G 20-20 Mbar - Natural Gas

**OVEN DOOR(S)**
- Oven Glass Window: Large See Through Glass

**OVEN CAVITY / UPPER OVEN CAVITY**
- NET CAPACITY (CBFT): 65lt = 2,3 cu
- Bottom Heating Element Wattage: 1200W
- Upper Heating Element Wattage: 1100W
- Convection Element Wattage: 1800W
- Low Grill (Broil): 1100W
- Grill (Broil): 2200W

**ACCESSORIES / OVEN CAVITY**
- Rack Positions: 5 side rack
- Chromed racks: 2

**COOKTOP**
- Zone Configuration: Ceramic Halogen 4 zones
- Front Left: 2,9kW = 10000btu
- Rear Left: 2kW = 7000btu
- Front Right: 1 kW = 3500btu
- Rear Right: 2kW = 7000btu

**DIMENSIONS/WEIGHT**
- Overall dim - width (unpacked): 23,6" (600 mm)
- Overall dim - height (unpacked): 35,4" (900 mm)
- Overall dim - depth (unpacked): 23,6" (600 mm)
- Overall dim - width (packed): 26" (660 mm)
- Overall dim - height (packed): 40,3" (1025 mm)
- Overall dim - depth (packed): 27,6" (700 mm)
- Net weight (lb /kg): 130lb / 59kg
- Brut shipping weight (lb /kg): 143lb / 65kg

**POWER / RATINGS (208/240 V, 60 HZ)**
- KW/Amps rating at 240V, 60Hz: 9,6 / 40

**INSTRUCTIONS FOR USE**
- Use & Care Manual: EN, SP, FREN, SP, FREN, FR
- Installation Manual: EN, SP, FREN, SP, FREN, FR
